SKILLS

TypeScript · React · Next.js · Node.js · Vue · NestJS · Express · Redux · React Native · PostgreSQL · MySQL · MongoDB · Redis · SQL · NoSQL · GraphQL

AWS · Docker · Git · CI/CD · Python · Django · PHP · Laravel · Microservices · WebSockets · gRPC · AI-assisted development · LLM-powered agents

Full Stack Development · Software Architecture · Tech design and research · System monitoring · TDD · Design Patterns · Scrum · Agile

LANGUAGES

Spanish: Native

English: Advanced

ABOUT ME

__Full-stack engineer__ with __6 years of experience__ building web and mobile products, mostly with React, TypeScript, Node.js, and React Native. Helped build a checkout and payments product __from 0 to 50,000+ stores and millions of users__, including its mobile app and the APIs behind it. Most recently worked on an __AI agent platform__ at Dialpad. Product-minded, used to __owning features end to end__ and working remotely with U.S.-based teams.

EXPERIENCE

Software Engineer Dialpad

05 2026 – 10 2026 Remotely

Worked on an **AI agent platform** for enterprise customers to build and deploy LLM-powered agents across voice and chat: an AI assistant chat, a **real-time visual agent editor**, and a knowledge base.

Full-stack development with real-time updates over WebSockets, Vue on the frontend, and Go/Python microservices with gRPC on the backend.

Stack: TypeScript, Vue, Go, Python, gRPC, WebSockets, LLMs, GCP

Software Engineer Tiendanube

03 2022 – 11 2025 Remotely

Joined Nube at its earliest stage and helped build it **from 0 to 1 and then to scale**: a product that makes checkout **up to 3x faster** with autofill and one-tap payments, **increasing store sales by up to 4%**, now used by **50,000+ stores** and millions of users across Latin America.

Owned features end to end across the web, the mobile app, and the **Node.js/NestJS APIs** behind them, from research and design to shipping and performance tuning. Worked closely with design and product, regularly proposing UX and product improvements that were adopted, and led technical initiatives as one of the most experienced engineers on the team.

Helped build the Nube mobile app with React Native from the ground up: real-time order tracking, push notifications, and user data management across stores, shipped through native store releases and CodePush over-the-air updates.

Stack: TypeScript, React, React Native, Node.js, PHP, Laravel, NestJS, MySQL, Redis, AWS, Docker

Software Developer Devartis

08 2020 – 03 2022 Remotely

Developed web features and platform improvements for RedShelf, a U.S.-based digital textbook platform, mainly with Django/Python, in agile, cross-functional teams.

Stack: Python, Django, React, GraphQL, MongoDB

EDUCATION

Computer Engineering (6-year degree) University of Buenos Aires

Graduated 2024 Buenos Aires, Argentina
